

Bringing you news, advice, and tools to improve your barn management experience

### Spring Cleaning Your Barn: The Jobs That Are Often Overlooked

By Emily and Sarah Harris, [Sisters Horsing Around](#)

Those of us who live in areas with cold winters look forward to warm weather, sunny days, and more riding. Now that spring is here, it is also time to do some barn cleaning. Even though spring is a great opportunity to get some much-needed deep cleaning done, there are a few jobs that are often overlooked. Some of these jobs can be tedious, others seem unimportant, but either way, they make a big difference in the long run.

#### Disinfect the Stalls

Thoroughly cleaning the stalls and disinfecting them is a task that is recommended and important but one that not many do. If the stall has a dirt base, then this will be more difficult, but there are ways to work around that. Make sure to empty the stall completely before starting. This includes removing horses, manure, bedding, stall mats, food, water, etc. Kentucky Equine Research suggests washing down the entire stall with a "10% bleach solution first to help remove biofilms that can protect bacteria from disinfectants," and let it dry. If using stall mats, be sure to thoroughly clean them as well. Then spray the stall with a veterinarian-approved disinfectant and leave it to dry. Once the stall is completely dry, sprinkle the bare floor with some barn lime or a stall absorbent, put everything back in, and add bedding.

#### Clean the Wash Stall

The wash stall is a place that is used frequently and can easily fall into disarray. Your best bet is to completely strip the area and wash down the surfaces. Remove tripping hazards and anything that can cause entanglements. Throw away any empty bottles, broken tools, tattered sponges, and rags. Then replace all the necessary items neatly. For indoor wash stalls, if space allows, keep everything well-organized by adding a shelf or hanging basket to hold bottles and tools. For outdoor wash stalls, a good barn hack is to use milk crates to keep wash items together. The holes in the milk crates will prevent water from collecting inside.

#### Clean Stall Fans

Cleaning stall fans is important not only to make the barn look clean but also for safety reasons. Stall fans have become a popular tool used throughout the hot summer and early fall months. Begin by reconsidering the type of fan you are using to keep your beloved equines cool. Some fans are not well-suited for the barn because of the potential risks they pose. For example, light-duty box fans can be purchased practically everywhere, but they can be a major fire hazard in a barn due to their open motor compartment. Agricultural fans are the safest because they have a sealed motor compartment and can withstand dust, dirt, and debris. These fans will only need a quick blow with a leaf blower or air compressor to get them clean. Make sure they are unplugged before starting.

BarnManager is gearing up to launch BarnManager Pro, offering the tools that a Professional barn needs to run a business and get paid.

- Speed up time to create and review your invoices with user-friendly invoice templates, clones, and automations
- Get paid safely, securely, affordably, and quickly through Stripe Connect
- Learn about your revenue and what types of products and services are generating the most income for your business
- Seamlessly integrate your invoicing and payment details into Quickbooks for more complex accounting

Existing subscribers to BarnManager's Essentials plan will have access to a free one-month trial of BarnManager Pro at the time of launch. Be sure to register for [BarnManager's Essentials Plan](#) before the launch to get access to BarnManager Pro to try it out for yourself.

### Sport Horse Podcast

Join BarnManager's Nicole Lakin and Dr. Tim Worden as they chat with leading equestrians and researchers to explore the fascinating science behind cutting-edge training and management techniques for sport horses. On this podcast, guests discuss recent research on topics relevant to ensuring sport horses achieve their best while staying healthy.

[Listen Here](#)

### TIP OF THE MONTH

Make sure to thoroughly towel dry your horse's legs after a bath before you put them in their stall. This will help prevent scratches from forming.
