

Bringing you news, advice, and tools to improve your barn management experience

The Official Barn Management Software of US Equestrian

BarnManager Officially Launches Pro Version

BarnManager, the leading online management system that is a must-have for barns throughout the equestrian industry, has officially launched BarnManager Pro. The Pro version includes innovative new features such as effortless invoicing, comprehensive revenue breakdowns, and a secure payment method.

BarnManager Pro is designed to help take barn management to the next level. The new Pro plan includes all the features of the Starter and Essential plans while also simplifying the invoicing process, allowing users to keep track of revenue, and safeguarding payment transactions. The Pro version is focused on building a user experience that meets the specific needs for barns of all sizes, removing the extra layers of complexity and rigidity often found in tools like Quickbooks and Freshbooks.

"BarnManager Pro doesn't simply allow users to make and send invoices and receive payments," explained Lakin. "It incorporates the nuances of equine business invoicing by allowing users to invoice for multiple horses, split shared expenses across multiple clients, put multiple horses on a single invoice, and ensure that the full amounts of payments are covered."
